Subject: Water Commons update

Hi Denise:

We had a working group meeting this morning, and I wanted to be sure to follow-up with you on the Water Commons meeting last week Monday. I understand MPS will continue to work on results and communicate those to Health, and will be communicating with students/parents when testing is done. Can you send me, just for my file, copies of that correspondence, and the letter to staff/principals? It's good to have, because we will always be asked about MPS. I think it would be good to have a list of school sites/fixtures that were mitigated at some point as well.

The Water Commons group on 8/15 was a very good conversation, and they were glad to hear via Paul of MPS' strategy. If you like, we can add you to the invite list, I believe Dir. Holmes is affiliated with that group, via the NAACP. He was one of the MWC members who met with the Mayor in June.

Let us know what we can provide to assist. I think there may be a push at some point to increase blood lead testing for young kids (<3, up to 6), and we certainly would want to partner with MPS on that.

-Aaron
